

AI for Physical Industries

Join us for a full-day deep dive into how AI is transforming the physical world. From factories and infrastructure to robotics, autonomy, and next-gen maintenance. This event brings together innovators, founders, operators, and investors shaping the future of Industrial, Physical, and Agentic AI.

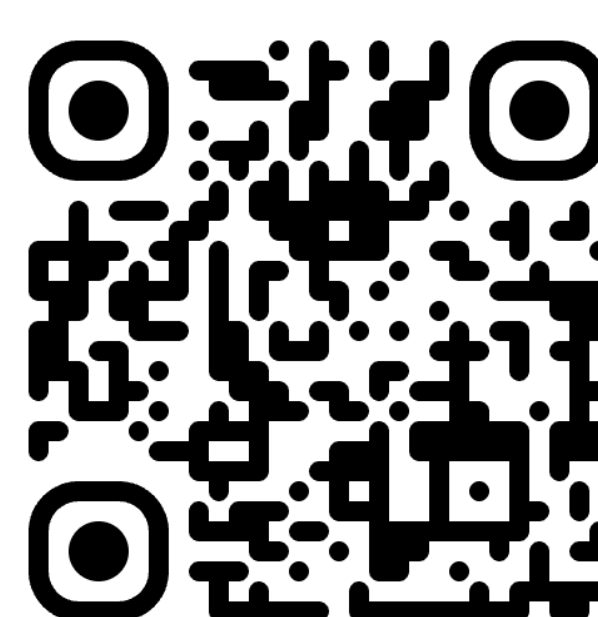

Expectations

- 1) Please update your Innovation Passports with your PSM.
- 2) During startup pitches, please complete feedback on the online form we provide.
- 3) Following the event, you will receive a post event report with findings and metrics regarding the startups who presented.

Agenda

- 8:00 AM** Registration
- 9:00 AM** The Digital Thread: Data Foundry for Operations, Analytics, and AI by **Sam Hamilton**
- 10:50 AM** Industrial AI Session
- 11:25 AM** Agentic AI Session
- 12:00 PM** Physical AI Session
- 12:35 PM** Highlighted Startup Section
- 1:00 PM** Lunch
- 2:00 PM** 1:1 Meetings
- 4:00 PM** Onsite Networking

Register: <https://luma.com/fcpoz8t6>

Date/Time
Feb 10, 2026

Location
Plug and Play HQ (2nd Floor)
440 N Wolfe Rd, Sunnyvale, CA

Guests
Special Invited Guests from
the Plug and Play Team

Startups

Antes

Antes.AI is regulatory Artificial Intelligence for the Physical World

AXOMIND

Axomind builds AI-powered automation software for discrete manufacturing.

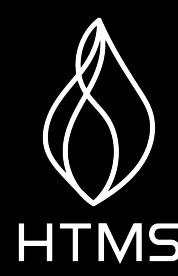

Bay Compute is the agentic operating system for data centers.

Clear

Clear converts engineering specs into export-ready, standards-mapped compliance packets.

f Flotive

Flotive is automated regulatory compliance for Utilities.

HTMS is a novel high temp composite material systems for advanced engineering applications.

interfAce

Interface eliminates design errors in legacy industrial systems using AI-driven insights.

Itera

Itera helps make hardware at the speed of software.

matter

Matter is autonomous factories for contract manufacturing.

mesoware

Mesoware is Effortless AI-powered automation, deployed in minutes.

mynr.

MYNR offers manufacturing companies complete transparency and control over complex product portfolios.

Startups

Ohmic Labs is a Battery Test Management Platform built to integrate with your testing lab.

Pontem AI is explore the intersection of artificial intelligence and the physical world.

Polymath is your engineering knowledge, amplified

Remy transforms any robot arm into an intelligent system that sees, reasons, and acts.

Rive is a coordinated team of AI agents for hardware supply chains.

RoboDock is building the automation layer for modern vehicle depots.

SiC Systems delivers a quantum-native, agentic AI platform for industrial process optimization.

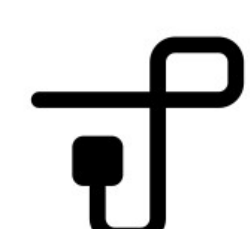

SciPhy makes autonomous performance prediction for hardware development.

Versor is a new applied AI research lab working on multimodal embodied AI.

Visual Layer is a visual data management platform that scales to billion images and videos.

Trellis Robotics unlocking access to hard-to-reach infrastructure using AI-enabled robots.
