Brazil in Focus

Innovation, Energy and Global Opportunities

Join us during Silicon Valley Summit for a discussion on **Brazil's rapidly evolving innovation ecosystem and the growing role of the country in the global energy transition.**

In this session, Plug and Play Brazil and Eneva will explore how Brazil is positioning itself as a strategic platform for innovation across energy, AI, infrastructure, and industrial transformation. From market opening and renewable energy expansion to organizational innovation and new business models, the session will highlight how corporations are transforming innovation into long-term value generation.

As Brazil continues to gain relevance in the global innovation landscape, this conversation will bring perspectives from both the ecosystem and corporate side on emerging opportunities, strategic priorities, and the future of innovation in regulated industries.

IN PERSON ONLY

AGENDA AND GUEST SPEAKERS

09:00 AM

Igor Mazaki Murakami
General Manager
Plug and Play Brazil

Igor Mazaki Murakami leads Plug and Play Brazil and during the session, he will present an overview of Brazil's innovation ecosystem, key market trends, Plug and Play's regional strategy, and the country's growing relevance in sectors such as energy, AI, fintech, and industrial transformation.

09:15 AM

Lucas Garcia
Innovation and Portfolio Manager
Eneva

Lucas Garcia will share Eneva's perspective on building innovation within one of Brazil's most complex and regulated industries. His presentation will cover organizational transformation, innovation governance, strategic innovation priorities, and how Eneva turns innovation initiatives into tangible business value generation.

AI Ready Data Centers

- The AI arms race is fundamentally an energy race. As hyperscalers pour hundreds of billions into compute infrastructure, the binding constraint is no longer chips: it's power. Grid interconnection queues stretch 5–8 years, rack densities are hitting physical limits, and data centers are being asked to do something the grid was never designed to support.
- This workshop brings together investors, operators, and founders building at the critical intersection of AI and energy infrastructure. We'll explore the full data center value chain: from grid interconnection and power delivery to facility-level orchestration and advanced cooling, and examine where the most compelling venture opportunities are emerging today.

Pilot to Profit: Embodied AI

Roundtable discussion: From Hype to Deployable Robots in the Enterprise

FEATURED SPEAKER & DISCUSSION LEAD

Lindon Gao | Founder & CEO, Dyna Robotics

- Founded Caper AI, Acquired by Instacart for ~$350M.
- Now building Dyna Robotics, **raised $150M+** from **Plug and Play, First round Capital, CRV, Amazon, Nvidia** etc.

DYNA | caper by instacart

WHAT'S THE PLAN

Join us for a closed-door roundtable on Embodied AI for Enterprise Operations — curated for corporate innovation, operations, and strategy leaders.

Lindon will open with a direct take on his Embodied AI thesis and what DYNA-1 robots are doing in production today.

The group will then move into a candid, open discussion on real deployment challenges: use-case viability, infrastructure and IT fit, change management, and P&L impact.

Attendance is limited and approval-only — reserved for a small group of senior leaders overseeing AI, automation, and next-generation operations.

AGENDA

1:00 PM	**Welcome & Intros**
1:05 PM	**Lindon's Embodied AI Thesis Presentation**
1:20 PM	**Round table Discussion**
2:10 PM	**Wrap up & Conclusion**
