

PhotonBahn - Accelerating Automotive with Photonics

THURSDAY, JULY 2

03:30PM- 05:00PM

📍 Im Wizemann, Quellenstraße 7, 70376 Stuttgart, Germany

Event Outline

Plug and Play and PhotonDelta are convening a **group of senior technology leaders for a closed-door automotive roundtable.**

The session is designed to **surface concrete, unmet challenges** in the automotive sector where photonics could play a role, directly with experts facing them daily.

Rather than open-ended discussion, this will be a **structured, problem-first session** across four areas of focus:

- Sensing & perception
- Connectivity
- Onboard intelligence
- Battery sensing & thermal management.

No prior photonics expertise is required.

Participants leave with concrete insights on where photonics can realistically address their engineering challenges.

Agenda

03:15 PM: Doors open

03:30 PM: Introduction & Inspiration

03:45 PM: Areas of Focus Discussion

04:15 PM: Challenge Mapping

04:55 PM: Wrap-up & Next Steps

05:00 PM: Networking & Drinks
